EXPERIENCE

Ernst & Young(E&Y), Hyderabad - Senior Consultant - June 2022 - PRESENT

- Build restful web services using java, springboot, write unit test case using junit, mockito and integration test case using postman/ newman.
- Create tables, procedures, triggers using postgresql and component based UI using Angular framework, conduct peer code reviews & enforce best coding practices.

Key features delivered :

- Implement Redis cache and a fall back mechanism if the Redis server is down.
- Created a template based architecture which is used in API and UI to dynamically add fields and validation.
- Integrated ServiceNow SOAP service to create tickets from a java based microservice.
- Worked on notification microservice using which email and service now templates can be created and sent dynamically using variables along with attachments.
- Migrated 3 microservice project from Webstack 1 to Webstack 2(Infrastructure migration)
- Created a common java library which has features such as OIDC authentication, zookeeper service, redis cache, database connection. This library is used across various projects and has helped reduce redundancy of writing the same feature in multiple projects.

Tata Consultancy Services, Bhubaneswar - System Engineer - *January 2020 - June 2022* Ticketing Mobile Application(AngularJS, Ionic, Capacitor, Java, SpringBoot, MySQL)

- Working on bug fixes and adding features to an existing application.
- Working on agile scrum methodology and involving in stand-up meetings.
- Developing Restful services using Java Spring Boot, Hibernate, My SQL.
- Creating solutions and unit tests with well documented code to deliver requirements/stories as per defined acceptance criteria.

ServiceNow Developer - July 2018 - January 2020

- Trained in web application development - HTML, CSS, Bootstrap, Angular, Java, My SQL.
- Worked on creating Service Catalog, Workflows, Reports, Events Notifications etc as per customer requirements.
- Bi-directional integration of ServiceNow with Jira for ticket creation. Developed a Badge Management application using which badges can be assigned to employees.
